WORK EXPERIENCE

07/02/2022 Porto, Portugal

Mobile app specialist Devoteam

- Build a android application in kotlin
- Help on architecture meetings to insure that is implemented the best practices
- Build CI/CD pipelines for automate testing and deploy

30/09/2019 – CURRENT Trofa, Portugal

ICT application developer Freelancer

As a freelancer I've been involved in several projects, some made by me, others as a team and others that were improvements of what already existed.

The servers are acquired from server companies and are mostly servers with the cpanel or plesk dashboard and the web projects are in PHP with the Laravel framework

I have already developed a room booking-style platform (web and native apps), a dashboard platform for a real estate agency (web), an online interview platform with video recording (native apps), a courier platform (web and native apps (client and courier)), various online stores with crm OpenCart.

The native Android applications are developed through Android Studio, mostly in Java with some components in Kotlin and use as dependencies (frameworks) Volley - Internet access, Glide - Download and cache of displayed images, Firebase - PushNotifications, Analytics, Crashlytics and RealTime Database, Realm - Database within the App and other UI's that vary from project to project all installed via Gradle

The native iOS applications are developed through X-Code in 100% Swift in the current version of the project and the UI is developed in Storyboard and used as dependencies (frameworks) Alamofire - Internet access, Kingfisher - Download and cache of displayed images and gif processing, Firebase - PushNotifications, Analytics, Crashlytics and RealTime Database, Realm - In-App Database all installed via Cocoapods

31/12/2016 – 30/09/2019 Santo Tlrsó, Portugal

mobile application developer 2US

In this work there was only one project that was dedicated to clubs and in it I developed:

-Android and iOS apps

Both applications were made in native, Android in Java and iOS in swift and had the functions of consulting all spaces inserted in the web dashboard, entering the guest-list of that space, after arriving at the space it was possible to validate the guest-list via qrcode (client app sampled and partner app validated), within the club it was possible to chat via chat on a private network just for that space, this filtering was done by the wi-fi network or qrcode on site, it was also possible to make bar orders and put photos that would be projected on a giant screen on site.

- Manager of the entire project

I was the only programmer on the project from the server to the applications

- .net programmer (C#)

I installed the windows server and made a partner dashboard in .net (C#), the database was in MySQL and the api was also made in .net that returned all data in xml, api that fed the mobile applications

09/10/2018 – 07/02/2022 Trofa, Portugal

shelf filler Jerónimo Martins

Repository of articles on the shelves (Part-Time)

It's a 4 hour job just to give me the financial stability that the freelancer doesn't give

08/10/2007 – 05/08/2018 Trofa, Portugal

moving truck driver Urbanos

Moved rooms and delivered parcels

EDUCATION AND TRAINING

14/09/2015 – 30/07/2017 Castelo da Maia, Portugal

Tecnologias e Programação de Sistemas de Informação Instituto Politécnico da Maia

Best student of the school year

Level in EQF EQF level 5

31/07/2018 – 02/06/2019

iOS App developer Udemy

This Swift 5 course is based on our **in-person** app development bootcamp in London, where we've perfected the curriculum over 3 years of in-person teaching.

It is a complete app development bootcamp teaches you how to code using Swift 5 and build *beautiful* iOS 12 apps for iPhone and iPad.

This course includes basics of swift and also **ARKit 2** for making **Augmented Reality** apps as well as **Core ML2 & CreateML** for making intelligent apps with **Machine Learning**. You'll be building your own machine learning models that use Artificial Intelligence to recognise images and emotions in tweets. You'll also be building 3D augmented reality apps that look like Pokemon Go and Harry Potter's magical newspapers!

LANGUAGE SKILLS

MOTHER TONGUE(S): Portuguese

Other language(s):

inglês

Listening C1

Reading C1

Writing C1

Spoken production B2

Spoken interaction B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

SWIFT | Linguagens de Programacao HTML, JAVASCRIPT, CSS, PHP, C#, ASP.NET | Gosto pelo trabalho em equipa | Domínio de Laravel | MySql | Android and IOS | Android (Java) | Conhecimento em Kotlin | python básico | Basics in SAS

ADDITIONAL INFORMATION

Organisational skills

- **Organization skills** - Collaborative team player with a proven ability to work seamlessly within a team-oriented environment.

Communication and interpersonal skills

- **Communication and interpersonal skills** - Excellent interpersonal and communication skills, fostering effective collaboration with team members and colleagues.

Work-related skills

Work-related skills

Technical Skills:

- Proficient in a variety of programming languages, including SQL, ASP.NET, C#, PHP, HTML, Java, Swift, JavaScript, jQuery, SAS, and Python.

Mobile Development:

- Demonstrated advanced programming skills in Android using Java/Kotlin and iOS using Swift.

Application Portfolio:

- Successfully developed and published 10 native Android applications (Java/Kotlin) and 10 iOS applications (Swift).

Web Projects:

- Contributed to the completion and publication of 25 web projects.
